

# Are you making the most of your minibar?

Traditionally minibars have stocked only drinks and snacks but with hotel guests now arriving with mobile phones, PDAs, digital cameras, video cameras and many other items requiring connectivity and power, forgetting power adapters and chargers is a common problem.

TeleAdapt's range of accessories includes emergency purchase items such as mobile phone chargers and modem and power adapter packs which will get the laptop or mobile phone user powered up and connected.

Ideal for sale from the minibar, shop or concierge, the range also includes other technology gadgets such as the SIM Backup, MiniMouse and USB Hub making it a great value-added offer of the technology lover or business traveller. Make your minibar product offering more up to date and guests will want to come back for more.

## Traveller Adapter Kit

Make your guests stay more relaxing by providing everything they need right there in their room.

The kit contains all the modem and power adapters guests will need to get their laptop powered up and connected to the Internet. Contents include:

- Universal power adapter to enable connection to the UK power supply
- US RJ11 to UK telephone/modem adapter
- BT to US RJ11
- Telespool modem extension cable

## USB MiniMouse

Plug and play USB mini optical mouse. Leading edge optical technology provides smooth, precise mousing with no moving parts and no cleaning required.

## USB SlimHub

4 port USB hub provides four extra USB ports to enable the use of up to four additional low powered USB devices. For example USB mobile phone charger, USB printer or digital camera.

## SIM Backup

The SIM Backup is a must have for anyone with a mobile phone, it allows the names and numbers stored on the SIM card to be backed up and stored. If the phone is then lost or stolen the data can be written to a new SIM card in minutes.

**Ideal for sale from the hotel shop, concierge or minibar.**

## USB TeleCharger and USB cigarette lighter adapter

This great new product gives fully flexible charging options for mobile phone users, as one of the most commonly forgotten items this is a really useful addition you can offer guests. The USB Telecharger enables guests to charge their phones from their laptop or car. The pack contains a USB phone charger with four tips to cover the most popular Nokia, Ericsson and Motorola phones, plus a USB to cigarette lighter for charging in-car.

## Wireless Card Adapter

As an increasing number of hotels are providing wireless hotspots in public areas, this wireless card adapter gives guests the opportunity to take advantage of the new service. With more guests using the hotspot it is a great opportunity for hotels to make increased revenues from the service.

Most laptops still don't have wireless networking capabilities so many people will not be able to take advantage of hotspots. This simple card is easy to install and compatible with most laptops on the market and can be sold easily from the front desk or from the minibar.

TeleAdapt also offer a technical help line advertised on the cards for guests to call so front of house staff or the concierge won't be contacted with technical questions that they can't answer. Training for front of house staff and IT teams can also be provided if necessary.

With fast 32-bit PC Card Type II interface, the DWL-650+ wireless card provides enhanced transmission speeds at up to 22Mbps, industry standard operation and is ideal for notebook PC users requiring fast, secure wireless network connection.

### Features

- IEEE 802.11b industry standard compliance
- Up to 22Mbps enhanced data transfer rate
- Supports Windows 98, 2000, ME, XP
- Wi-Fi compatibility certified
